

LocalLead CRM CSV Import Guide

Use this guide to format outside client lists from Claude, Codex, spreadsheets, virtual assistants, or manual research before importing into ArkiTech Sol CRM.

Required Header Row

businessName, category, phone, email, website, address, city, state, googlePlaceId, googleMapsUrl, googleRating, googleReviewCount, status, priority, notes

Column Rules

Header	Required?	What to put there
businessName	Required	Exact business/client name. Example: Bright Smile Dental
category	Optional	Industry or service type. Example: Dentist, Roofing contractor
phone	Optional	Main phone number. Keep area code when available.
email	Optional	Owner or public contact email. Leave blank if unknown.
website	Optional	Full website URL if found. Use https:// when possible.
address	Optional	Street address only. Example: 123 Main St
city	Optional	City or town. Example: Raleigh
state	Optional	Two-letter state is best. Example: NC
googlePlaceId	Optional	Google Place ID if known. Usually blank for outside research.
googleMapsUrl	Optional	Google Maps profile/share URL if found.
googleRating	Optional	Decimal rating from 0 to 5. Example: 4.7
googleReviewCount	Optional	Whole number review count. Example: 38
status	Optional	NEW, SAVED, CALLED, MEETING_BOOKED, NOT_INTERESTED, FOLLOW_UP, CLOSED.
priority	Optional	STANDARD, PRIORITY, or FAVORITE. Blank becomes STANDARD.
notes	Optional	Short research notes, call context, owner info, or offer angle.

Status And Priority Options

Status values: NEW, SAVED, CALLED, MEETING_BOOKED, NOT_INTERESTED, FOLLOW_UP, CLOSED. Priority values: STANDARD, PRIORITY, FAVORITE. Invalid or blank values fall back to SAVED and STANDARD.

Example CSV Row

```
Bright Smile Dental,Dentist,(919) 555-0123,frontdesk@example.com,https://brightsmile.example,45 Oak Ave,Raleigh,NC,,https://maps.google.com/?cid=123,4.8,37,FOLLOW_UP,FAVORITE,"Website looks outdated. Ask about new patient landing page and online booking."
```

Prompt For Claude Or Codex

Turn the business research below into CSV rows for LocalLead CRM. Return only valid CSV, no markdown. Use exactly these headers: `businessName,category,phone,email,website,address,city,state,googlePlaceId,googleMapsUrl,googleRating,googleReviewCount,status,priority,notes`

Rules: `businessName` is required. Leave unknown fields blank. Use two-letter state abbreviations. Use SAVED for status unless the notes clearly imply CALLED, FOLLOW_UP, MEETING_BOOKED, NOT_INTERESTED, or CLOSED. Use STANDARD, PRIORITY, or FAVORITE for priority. Mark only the strongest prospects as FAVORITE. Put concise sales context in notes. Escape commas or quotes correctly for CSV.

Import Checklist

1. Keep the first row as the exact header row from this guide.
2. Do not rename columns or add extra columns.
3. Save the file as .csv, not .xlsx.
4. Import up to 500 rows at a time.
5. Review duplicate choices before adding, merging, or cancelling.
